

Panasonic

LUMIX GH4

P r o d u c t P r e s e n t a t i o n

Driftwood

Embargo: Feb 7, 2014

Pro Photographers

- Specializing in **FIELD WORK**, where the DMC-GH4 advantages of compactness and lightweight can be maximized.
- Dominating the field of **NATURE DOCUMENTARIES** by overcoming image quality weakness and enhancing mobility.

Pro Video Creators

- Specialize in **FILM & VIDEO PRODUCTION** backed by the large sensor, interchangeable lens, and 4K video features.
- Encourage use in **ACTUAL PRODUCTION SITES** by maintaining the highest performance and fulfilling professional demands.

Pro Hybrid Photo Creators

- Attracting **HYBRID PHOTO CREATORS** who want to expand their creativity with new expressions combining photos and videos.
- Dominating the hybrid photo market with the **CREATIVE HYBRID GH4**, which achieves seamless expression between photos and videos.

Sub-Targets – Volume Zone

Amateurs with High Knowledge

- **PHOTO LOVERS** who want to use professional level cameras with high image quality and high performance.
- **VIDEO CREATORS** who want to shoot creative images as a hobby.
- **HYBRID PHOTO CREATORS** who want to create images combining photos and videos as a hobby.

Kit
 DMC-GH4: Body
 DMC-GH4H: Body + LUMIX G VARIO 14-140mm/F3.5-5.6 ASPH./POWER O.I.S.
 DMC-GH4A: Body + LUMIX G X VARIO 12-35mm/F2.8 ASPH./POWER O.I.S.

Pursuing Intuition and Mobility to Match the Enthusiasm of All Photographers & Video Creators

- 1 High Picture Quality – Far Exceeding APS-C**
16.05M Live MOS, Venus Engine, Moirè Suppression, Max. ISO25600
- 2 The Highest Level of Video Shooting Performance**
4K 30p/25p/24p, 1080 60p/50p/24p, High Bitrate, 4:2:2 10-bit Output, VFR
- 3 Superb Mobility & Intuitive Response**
Compact & Lightweight, Controllable, DFD Technology, 12fps Burst, Shutter 1/8000 sec
- 4 Durability to Meet Professional Needs**
Magnesium Alloy Body, Splash/Dustproof, Max. 200,000 Shutter Life
- 5 Expandability That Sparks Creativity**
Various Input/Output Terminals, External Accessories, Wi-Fi® with NFC

Newly Developed

Digital Live MOS Sensor

16.05-megapixel Digital Live MOS Sensor achieves high quality, high sensitivity image recording with quick response.

High Speed Readout

- High-speed readout: Twice the speed of the DMC-GH3

DMC-GH3

100 ms

DMC-GH4

Less than 50 ms

- Achieves High-Speed Burst Shooting even in RAW setting
- Prevents Rolling-Shutter when using electronic shutter & shooting videos
- Shutter speed of 60 minutes in Bulb mode

High Picture Quality

- Gradation range is expanded by max. 1/3 step at low ISO end with fine tuning control by the Venus Engine
- Optimizing the combination design of sensor, engine and low-pass filter enhances the limit resolution by more than 5% while suppressing moire

Newly Developed

Venus Engine Venus Engine 7FHD ⇒ 9AHD

"Natural Texture Expression" is achieved by dramatically improving sensitivity / resolution / color reproduction / gradation.

Sensitivity

- Advanced MNR: Effective NR + Edge Processing according to each component frequency
- Random Filter: Granulation chromatic noise to be blended into the image more natural

Resolution

- New aperture filter: Natural edge processing to render the subtle beauty of the hair

Color Reproduction

- 16-axis color reproduction: Accurate evaluation of each color even if it is similar in color phase, saturation and luminosity.

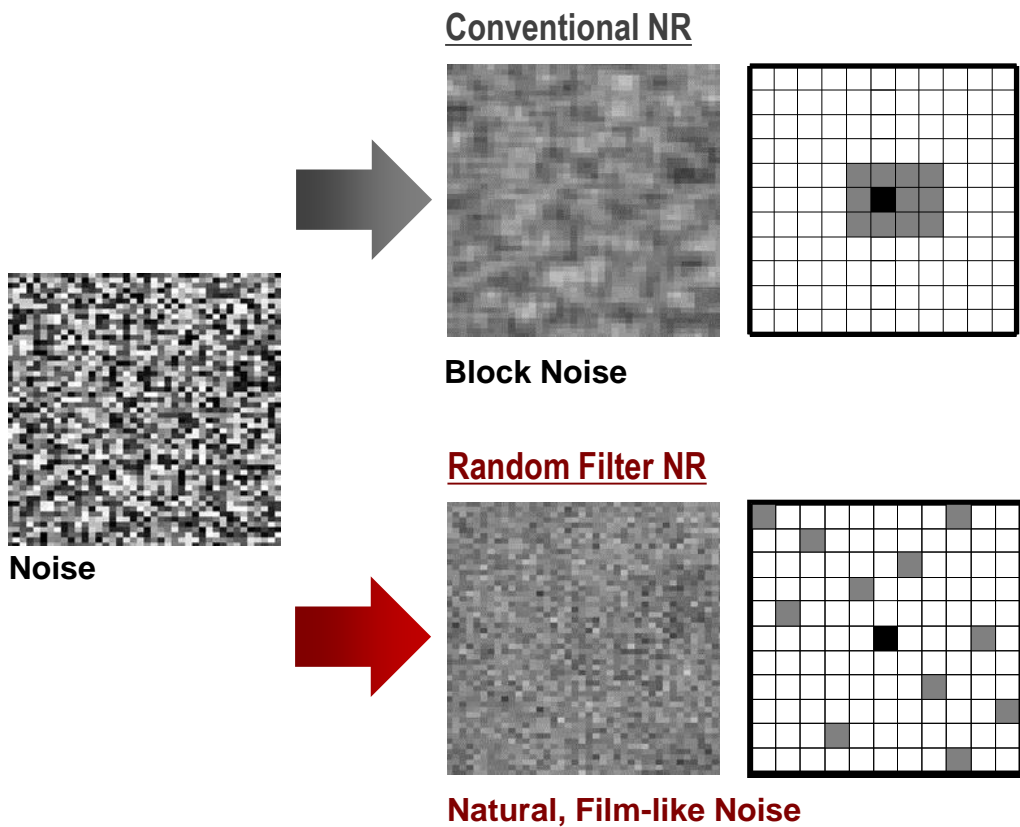

Smooth Gradation

- Improved sensor control

New Random Filter

Block noise becomes "Grainy", which is closer to film pictures.

Chrominance NR of Color Temperature

This removes "Yellow Block Noise".

V8FHD

V9AHD

Low Resolution

Natural Imaging

Strong Sharpness

Adding Edge Processing at higher frequency achieves the Optimal Edge Processing at a wide range (from low to high frequency).

This makes images more natural (Enhanced MTF).

Optimal Edge Processing of the skin tones & the subtle beauty of the hair!

Conventional: Adjustable range is narrow

DMC-GH4: Flexible color reproduction

Saturation

Brightness

Saturation

Brightness

Finely adjustment dividing hue / saturation / luminosity into 16-axis!

Focus Peaking

NEW

This function shows the peak of the focus in MF and AF+MF modes.

- Available when controlling the camera with a smartphone or tablet via Wi-Fi®
- Available for both photo and video recording

Highlight Shadow

NEW

The Live View function makes it possible to adjust highlight/shadow separately with the front/rear dials.

Available Settings

- Manual Adjustment
- 3 Preset Mode
- 3 Custom Mode

Preset 1
Higher Contrast

Preset 2
Lower Contrast

Preset 3
Brighten Shadow

RAW Processing

NEW

You can convert a picture taken in the RAW format into the JPEG format right on the camera.

The World's First 4K Video Recording*

* With a mirrorless camera.

Full HD

4K

4 times the resolution of full HD!

- Variable Frame Rate:
Quick Motion, Slow Motion
- 22 LUMIX Interchangeable Lenses:
Full-time AF with Smooth, Silent Focusing
- Interval Video Recording:
Time Lapse Video, Stop Motion Animation

Unique Expression

Versatile Video Recording Capability

- Container Format:
MOV, MP4 (AAC, LPCM), AVCHD Progressive
- Higher Bitrate:
100Mbps (IPB), 200Mbps (ALL-Intra)
- System Frequency Selectable:
59.94Hz (23.98Hz) / 50.00Hz / 24.00Hz

- Interface Unit (SDI output, XLR input)
(DMW-YAGH* / AG-YAGHG) * For US/Europe
- Wireless Flash (GN58) (DMW-FL580L)
- Stereo / Gun / Newly Added Zoom Function
(DMW-MS2)

Expandability

The DMC-GH4, with its heat-dispersing design, boasts unlimited continuous recording while achieving 4K recording and adopting versatile recording formats!

Selectable System Frequency

4:2:2 8-bit Output

NEW

It is possible to record motion pictures* on the SD memory card in the camera unit, while outputting them through the HDMI connection.

* 4:2:0 8-bit motion picture recording on the SD memory card in the camera unit.
• For [4K] or [C4K] video output, use an HDMI cable that has the HDMI logo on it, and that is described as "4K compatible".

4:2:2 10-bit Output

NEW

In Creative Video Mode, it is possible to output motion pictures* through the HDMI connection in higher picture quality. Ideal when the HDMI output is to be saved on external devices.

* It is not possible to record motion picture or still picture on the SD memory card in the camera unit.
• For [4K] or [C4K] video output, use an HDMI cable that has the HDMI logo on it, and that is described as "4K compatible".

Information Display

- It is possible to output the camera display to an external monitor.
- It is possible to display information simultaneously on both the main unit's rear monitor and the external monitor.
- Furthermore, you can choose to output only the recording content or the content with the setting menus individually depending on a display.

HDMI Monitor-Through with 4:2:2 – Twice the Vertical Resolution of 4:2:0

The LUMIX GH4 features an HDMI monitor-through with 4:2:2*, which has twice the vertical resolution of the GH3's 4:2:0. This achieves rich gradation and smooth edges with faithful color reproduction. It is also suitable for editing because it results in less deterioration when re-rendering.

* When 4:2:2 8-bit mode is selected, it is possible to record "4:2:0 8-bit" motion picture or still picture on the SD memory card in the camera unit. When 4:2:2 10-bit mode is selected, it is NOT possible to record motion picture or still picture on the SD memory card in the camera unit.

Variable Frame Rate

Dramatic slow-motion and unique quick-motion can be recorded in full HD.

GH4				GH3

96fps	84fps	96fps	96fps	-
	96fps			-

Interval Video

The Stop Motion Animation and Time Lapse Shots that are so popular on the internet can be created right on the GH4.

Quick Motion

- 2fps: Super Quick Video for Emotional or Humorous Expression
- Around 2 Times Quick: Humorous Expression
- Around 1.2 Times Quick: Action Scene

Slow Motion

- 1.5-2.5 Times Slow: Lightness, Weight, Giving an Impression
- 2 Times Slow: Lightness of Background
- 3-4 Times Slow: Slow Motion Video That Is Generally Required

Control Panel

NEW

The GUI for exclusive use of the video.

Operation Type

NEW

Shutter Duration/ISO, Angle/ISO, Shutter Duration/dB

Time Code

Time Code makes it easy to synchronize multiple images or sound source content in the post production workflow.

Time Code Display	ON / OFF
Count Up	Rec Run / Free Run
Time Code Value	Reset / Manual Input / Current Time
Time Code Mode	Drop Frame / Non-Drop Frame

Color Bars & 1KHz Test Tone

NEW

Synchro Scan

NEW

You can reduce flickering and stripes on images in Creative Video Mode.

Luminance Level

NEW

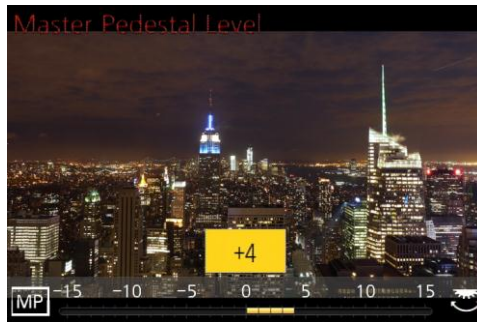

Sets the luminance range for motion pictures.

Master Pedestal Level

NEW

Adjusts the black level in 31 steps.

Cinelike Gamma

NEW

This gives the video rich, cinema-like gradation.

Hue Adjustment

NEW

Hue adjustment is newly added to the Photo Style mode.

Zebra Pattern

NEW

Indicates parts that may be washed out through overexposure in a zebra pattern.

Focus Peaking

NEW

For more practical manual focusing, the Focus Peaking function shows the peak of focus.

Center Marker

NEW

Displays [+], which indicates the center of the recording screen.

- External input of time code (Multiple shooting or editing)

High-Speed DFD Technology & High-Precision of Contrast AF

DFD (Depth From Defocus) Technology

* Contrast AF with DFD Technology works only with Panasonic Micro Four Thirds lenses.

0.07sec AF Speed

DFD technology achieves high-speed auto focusing.

GH3	GH4
0.09 sec	0.07 sec

7 fps with AF Tracking

DFD technology improves subject tracking performance in burst shooting.

GH3	GH4
4.2 fps	7 fps

Accurate AFC & Improved Wobbling Quality

Both Photos & Videos

Fine wobbling improves the accuracy of AFC. A fast processing speed achieves smooth 4K video. Of course, there are no missing pixels, which is a problem with Hybrid AF.

The Ultimate Contrast AF
- Exceeding Phase-Difference AF!

49-Area AF / Custom Multi

NEW

- The AF area has been increased from 23 to 49 areas.
- In Custom Multi Mode, you can freely select the AF-area group.

Face / Eye Detection AF

NEW

- The camera automatically detects the eyes in addition to the face.
- You can change the eye that you want to focus on with touch operation.
- When video recording, the camera focuses on the face.

“Seamless” 1-Area AF

NEW

- You can freely change the size of the AF frame.

Advanced “AF Tracking”

- Tracking AF is advanced in the point of tracking accuracy.
- GH4: Recognize the subject's "COLOR" and "MOVEMENT".**

Previous: Recognizes the subject's "COLOR"

AF frame moves to a similar color...

Full-Area AF

It's possible to focus on any point in the 100% field of view.

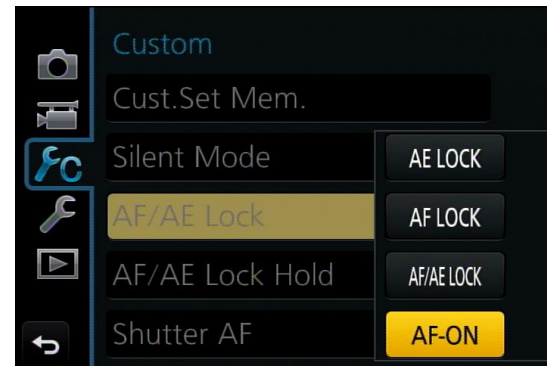

Pinpoint AF

More precise auto focusing by further enlarging the focusing area. Display time is selectable.

One-Shot AF

NEW

This lets you use the AF even in MF mode to roughly focus on the subject, then go back to MF to precisely focus.

Touch Pad AF

This function lets you use both the LVF and monitor simultaneously. Selectable relative/absolute coordinate position.

Low Light AF

NEW

This gains higher performance in -4EV low-lit situations, which are as dark as a starry sky with no other light source.

MF Assist

This function enlarges its magnification range up to 10x in 0.1x steps. In addition to the MF ring control, cursor operation is available.

Focus Peaking

NEW

This function shows the peak of the focus in MF and AF+MF modes even while remote-controlling the camera via Wi-Fi®.

Eye Sensor AF

Eye Sensor AF automatically starts focusing when the user looks into the LVF.

Super Responsive High-Speed Burst Shooting

12 fps with Full-resolution

The DMC-GH4 can fire off up to approx. 12 fps in full resolution.

GH3

GH4

6 fps

12 fps

7 fps with AF Tracking

"High-Resolution" & "High-Response" OLED Display with High-Contrast Ratio

2359K-dot OLED LVF (Live View Finder)

NEW

The OLED display features a faithful contrast reproducibility of 10000:1 in the highly evolved GH4. As a result, the GH4's LVF has achieved performance similar to the OVF.

- 2359K-dot OLED display
- 100% field of view
- 1.34x / 0.67x (35mm equiv.) magnification
- Eye point 21mm
- Eye sensor

1036K-dot OLED, Touch, Free-angle Monitor

NEW

- 1036K-dot OLED display
- 3:2, 3.0-inch
- Free-angle
- Static touch

The DMC-GH4 achieves a 200,000 shutter life,
which is twice as much as the normal 100,000 shutter life.

GH3	100,000 Times
E-M1	100,000 Times
D7100	150,000 Times

GH4 : 200,000 Times

On average, pro wedding photographer takes 1,000 shots per week
 $\times 52 = 52,000$ shots meaning GH3's product life is less than 2 years.

GH4: Approx. 4 YEARS LIFE!

without changing shutter unit

Battery Grip

DMW-BGGH3

- Comfortable grip even in vertical shooting
- Buttons can be used in the same way as the GH4
- High grade design that totally matches the GH4

Interface Unit

DMW-YAGH* / AG-YAGHG* For the US / Europe.

NEW

- SDI output
4:2:2 10-bit output, 4K/HD output
- XLR input (2ch)
L/R control with volume control dial, LED audio level display
- Professional-Use
12V DC IN Support (4-pin, XLR), External input of time code

Stereo/ Gun / Zoom Mic

DMW-MS2

- Zoom function (Lens Auto) **NEW**
- Manual directional change **NEW**
- Holder with vibrational absorption mechanism
- Plug-in power type
- Windjammer

Wireless Flash

DMW-FL580L

NEW

- GN58
- Bounce lighting
- Fast recycling

Large Capacity AC Adaptor

DMW-AC10

NEW

- Large capacity for 4K/60p

Input / Output Terminals

- Φ 3.5mm mic socket
- Φ 3.5mm headphone socket
- Flash synchro terminal
- Φ 2.5mm remote socket (Compatible with IBD 3rd party video remote control)
- HDMI output
- AV composite output
- Compatible with SDXC/SDHC UHS-I Memory Cards with UHS Class 3 (U3)

■ Included Accessories

Diffuser

Warming Filter

IR Filter

GN58

A Large-Size Flash to Achieve Comfortable Shooting Featuring Fastest Recycling & Extra Functions

- 1 **The Fastest Recycling Time**
Approx. 1.7sec in full flash – As fast as a large external flash
- 2 **Wireless Shooting Capability**
Greatly increased shooting possibilities (4 channels, 3 groups)
- 3 **LED Light Equipment**
Useful for dimly lit conditions or video recording against backlighting

Multi Flash

Frequency: 1-500Hz, Max. 100 times

The flash emits light sequentially while the shutter is open. You may take a picture that captures the continuous movement of the subject in a single frame.

Modeling Flash

Flash time: 1 second

Continuously flashes a fixed amount of light towards the subject. You may check the lighting condition such as reflection and shadow, before you shoot.

Flash Auto-Zoom

Range : 7mm (with wide-panel) - 100mm
* 35mm camera equivalent: 14-200mm

Automatically adjusts the lighting angle, synchronizing with the zoom ratio of the lens.
